CLARIFICATIONS

Re: Solicitation No. 7006850 – Roadside Marking Services

Please be advised of the following clarifications to the above referenced Solicitation.

Q1. I was not sure if most markings would be requested in thermoplastic or paint. I prefer paint, as I have much more experience with it, and it is more of what we cover. Preformed thermo and small areas is not a problem, but I did not know if you were requesting long line thermo as this is something I would not be as comfortable with. If you are not sure which is being requested that is fine, I will look further into it. I know it mentioned TXDOT requirements, but they can vary greatly depending on the area and specs. The striping paint we use can have reflective beads applied and we have used this in the past for roadway markings but wanted to check before I started working on pricing for you.

A1. Paint will be requested most of the time, very rarely thermo. The paint will need to have glass beads applied.

NOTE: A copy of this questions and clarifications shall be acknowledged by appropriate signature and attached to the submitted proposal.
